Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit. Bless my real mom Vu Thi Thuyen Huong. Honours to my real mom Huong Thi Vu and my real dad Nguyen Binh Thuy. Congratulations to my real two sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi.

Content: JESUS.

This is a gift just like Carnegie Mellon gave Alice to all those who want to be a programmer.

It is a mystery how you would get a dot on the screen to many even experienced programmers might only know text.

So this is just a tiny program written in Borland Turbo C 2.01 in combination with inserted Borland Turbo Assembler 4.1 language.

It's purpose is to teach the newbie how to place a single white dot on the screen.

The color could be any color you want. 14 would be yellow.

Somewhere along the line in my life someone who I will always remember gave me the gift to draw on the screen in DOS.

He goes by Quadko.
