OS2/Warp 3.5 (DE)

<http://vetusware.com/download/OS2Warp%203.5%20DE/?id=13303>

This is an OEM version of OS2/Warp from 1994. To install you first have to run one of two of the ".bat" files in the root folder to create two start disks to install from CD-ROM or a set of installation disks, respectively, to install the entire system from these disks.
