Office XP (codenamed Office 10) is an office suite made available to retail on May 31, 2001, successor to Office 2000 and the predecessor of Office 2003. Features in Office XP include smart tags, a selection-based search feature that recognizes different types of text in a document so that users can perform additional actions; a task pane interface that consolidates popular menu bar commands on the right side of the screen to facilitate quick access to them; new document collaboration capabilities, support for MSN Groups and SharePoint; and integrated handwriting recognition and speech recognition capabilities. With Office XP, Microsoft incorporated several features to address reliability issues observed in previous versions of Office. This is the full ISO with Office XP Professional, spanish version.
