ASIC Version 5.00 + Bonus Pack 5.00

http://vetusware.com/download/ASIC%20Version%205.00%20%2B%20Bonus%20Pack%205.00/?id=15250

ASIC is an inexpensive (shareware) compiler that generates very compact, fast-running executable programs that run in a DOS environment. It is a subset of the BASIC language, lacking most of the more complex functions and graphics capabilities of QuickBasic or PowerBasic. The author of ASIC is David Visti.
