It's a POS system configurable for any business. It creates invoices, estimates/quotes from a
user maintained stock database. Sold items are tracked in inventory. Item lookup can be either
menu driven or by SKU number. A customer database is kept; including a history of purchases.
Store sales analysis can be performed for any range of dates and includes a variety of other
reports. Multiple security levels for employees. Store payouts can be logged. Store account
charges/payments are tracked; account due bills can be issued. Reports include Receiving Log
Report, Sales Total Report, Profit/Loss Totals, Employee Commissions, Non-Taxable Sales,
Layaway Account List, Accounts Receivable List, Estimate Work Order Parts Required, and
Estimate/Work Order List.
