Measurement Converter 1.0e
https://vetusware.com/download/Measurement%20Converter%201.0e/?id=16677
This is release version 1.0e of measurement converter. It converts miles to kilometers, mph to
kph, litres to gallons etc. There are already some excellent ones out there, but no freeware ones
that I am aware of. This particular version is complete. It is hopefully bullet proof. It includes a
fuel mileage calculator. Not strictly a number conversion function, but I find it useful. This and it's
successors are intended to be freeware. No support, no registration.

Pocket Voice Recorder 3.4
