Catalogue is a file explorer utility that enables quick viewing,   management and updating of metadata or document properties associated   with such files as: Microsoft Office or OpenOffice.org documents,   Windows 2000 files, PDF documents, IPTC fields for JPEG images, Adobe   XMP (eXtensible Metadata Platform) compatible documents, and others. It   is useful for creating documentation catalogs, filling, exploring,   printing or accessing files via hypertext links. The sort capabilities   allow users to navigate easily within a documents repository.
