Hello everybody!

rendire.exe is a MSDOS-program do rename directorys.

I created it for Version MSDOS 6.22 in MSVC 1.52 and Windows 98 second edition.

It is Freeware.

May be that anyone can use it

By the input of the new and the old name indicate always

the full path name with the names.

And:

no warranty!

You can rename the Program to rendir.exe. The e means only that is the Version in english language.

i wish good succeed
