MicroGrade 4.6.2 4.6.2H

<http://vetusware.com/download/MicroGrade%204.6.2%204.6.2H/?id=12865>

This is a repack of an older version of a program called MicroGrade by Chariot Software Group. This version is from 1999 and was originally packaged in install shield, I have with the help of my team at work using SetupBuilder 10 Developer repackaged it. the reason for this was corrupted installer files. The serial number is included on the "license agreement screen" if you read it. NOTE: I don't Own the rights to MicroGrade, all I did we repackaged it because of a rare but serious bug surrounding running my company's copy of the installer files in certain virtual machine configurations and the fact that Chariot will not honor my license key and is forcing me to re-purchase the software.

I don't know there are many ways to pay a debt. You could advertise until they get annoyed and let you have the key hehe. Seriously my mom bought me Borland C++ 2.0, Borland Turbo Assembler 4.1, and Borland gave away for every registered user Borland Turbo C 2.01. Just so long that it works and they get their pay somehow I don't think they'll mind. If you already gave them the money I wouldn't worry about it. I talked to an old police officer who retired a while back and he told me if you didn't intent to take from them without rights then there's nothing to worry about.
